

# DENSO® ROAD MAINTENANCE PRODUCTS

BITUMINOUS TAPES & PRIMERS FOR THE SEALING AND WATERPROOFING OF ROAD SURFACES AND PAVEMENTS

PRODUCTS IN THE RANGE:

DensoBand™

Denso Re-instatement Tape™

Denso Butyl Spray Primer™

Denso Primer D™

## DENSO® ROAD MAINTENANCE PRODUCTS

A RANGE OF ROAD AND MAINTENANCE PRODUCTS THAT EFFECTIVELY SEAL AND PROTECT ROAD SURFACE JOINTS FROM WATER INGRESS AND EROSION.

DENSOBAND FORMS A TOUGH AND CONFORMABLE BOND

### DENSOBAND™

A polymer modified bitumen strip for sealing cold joints with hot asphalt to asphalt, concrete or steel in road repair or construction.

DensoBand™ forms a flexible watertight seal which allows for road movement from traffic load and thermal changes thereby preventing cracking and the subsequent failure of the joint.

#### BENEFITS & USES

- Used in road, parking lot, railway crossing and airport runway repair and construction.
- Sealing bridge decks and flyover expansion joints.
- Minimizes return maintenance visits.
- Uniform flexible seal for joints.
- Adheres to asphalt, concrete, steel and other surfaces.
- Withstands road movement from traffic load and thermal changes.
- Over 30 years of proven history.
- Accepted by many municipalities.

### PRIMERS

#### DENSO PRIMER D™

A specially formulated primer for preparing the surface of concrete, asphalt or steel for the application and good adhesion of Denso road maintenance products.

Both Denso Primer D and Denso Butyl Spray Primer can be used with either DensoBand or Denso Re-instatement Tape.

## SYSTEM FEATURES:

- Prevents water ingress in new and existing joints between asphalt, concrete and steel.
- Creates a tough, durable seal and reduces the need for return maintenance visits.
- Fast installation for minimal road closure time.
- Hot and cold applied systems.
- Specially formulated primers to encourage good adhesion of products to joint surfaces.

MAINTENANCE PRODUCTS**

RE-INSTATEMENT TAPE

COMPLETED INSTALLATION  
OF RE-INSTATEMENT TAPE

RE-INSTATEMENT TAPE

## DENSO RE-INSTATEMENT TAPE™

A cold applied, polymer modified bituminous sealing strip that is applied vertically to create a tough, uniform, waterproof seal. For sealing joints between existing asphalt and new asphalt installations. Used in conjunction with primer. Adheres to asphalt, concrete and steel.

### BENEFITS & USES

- Instantly seals against water ingress, preventing cracking and fretting.
- Traffic can pass over immediately.
- Elastic properties accommodate thermal movement.
- Fast installation.
- Proven effective on asphalt, concrete and steel.

DENSO BUTYL SPRAY  
PRIMER IS EASILY  
APPLIED TO THE  
VERTICAL JOINT FACE

## DENSO BUTYL SPRAY PRIMER™

Denso Butyl Spray Primer™ is easily applied to quickly provide an adhesive to hold the appropriate Denso asphalt tape in place until the installation of the top lift of hot mix asphalt. Convenient and portable, Denso Butyl Spray Primer can be used when the substrate is clean but cold, to ensure good adhesion prior to the asphalt placement.

One can is expected to cover approximately 230 LF (70 linear meters) per hour allowing for quick installation of DensoBand and Denso Re-Instatement Tape to cold joints of many sorts including asphalt, steel and concrete thereby protecting new asphalt joints from the destructive power of water and ice.
